PATH Study Wave 4 Annotated Instrument – Explanatory Notes

BOX ID:	R04_PMD07
(1) Structure of Question Boxes. Each question in the annotated instrument is presented in a box. Within the box, the top row usually indicates the name of the variable(s) in which data collected by that question are stored. However, for questions with a “choose all that apply” structure, the top row states “SEE BELOW:” and the variable names are displayed next to the corresponding response options. All variable names are displayed in bolded red font. The second row includes the question text, including any instructions for the respondent (for example, “Choose all that apply”). The next several rows display the response options. The last rows specify which respondents were asked the question, followed in many instances by special instructions used in programming. The rows that specify which respondents were asked the question are split into two parts: The first part (the “ASK Description”) provides a general description of which respondents were asked; the second part (the “ASK Specification”) identifies which respondents were asked as a logic statement using specific variables.	
(2) Non-Question Boxes. Some boxes in the instrument do not include questions. These boxes include introductory text, display instructions, or more complex programming instructions, such as those used to create derived variables.	
(3) Question Routing. The instrument was designed with the assumption that all respondents to a question would be asked the next question, unless there are specific instructions routing a subgroup of respondents to a different question. The phrase “GO TO” precedes such routing instructions. Complex routing instructions are split into two parts: The first part (the “GO TO Description”) provides a general description of the routing instructions; the second part (the “GO TO Specification”) reiterates the instructions as a set of logic statements, using specific variables. Non-response values (“DON’T KNOW” and “REFUSED”) are treated the same as response values for routing; if they are not mentioned in specific routing instructions, then the routing follows other criteria. Many routing instructions consist of multiple statements. The first statement describes a set of conditions and indicates the next question to be asked if those conditions are met. (“IF ____, GO TO ____.”) Subsequent statements use the word “else” to indicate that the conditions given in previous statements have not been met. (“ELSE, IF ____, GO TO ____.”) This means that the first statement fulfilled by the respondent always indicates the next question asked.	
(4) Randomized Question Order. Some series of questions were presented to respondents in a randomized order. In such instances, a non-question box precedes the series and specifies which questions are part of the randomized series. Routing within these series indicates which questions were asked of different respondents and reflects the static order of the questions in this document. It does not reflect the actual order in which the questions were displayed for respondents.	
(5) Iterative Loops. There are several questions, series of questions, and entire sections that are specified as being asked in a loop. In such instances, questions were iteratively asked of the respondent to collect similar information on two or more topics. For example, the questions about cigars are asked iteratively regarding traditional cigars, cigarillos, and filtered cigars. These items are specified a single time, with programming instructions identifying the beginning and ending of the loop, how it is to be changed for each iteration, and the order in which each iteration should be presented. Looped items utilize iteration indicators to provide precise ASK Specifications and GO TO Specifications for each iteration of the item. The responses for each iteration are captured in different variables, which have different suffixes to indicate which iteration each variable applies to. For example, the variables for traditional cigars end in TC, the variables for cigarillos end in CL, and the variables for filtered cigars end in FC. (Please refer to the PATH Study User Guide for detailed information on variable nomenclature.) ASK Specifications and GO TO Specifications address each iteration separately, with the particular variable identified at the start of the specification. (For example, “FOR R04_YG1005TC:”	

precedes the ASK specification that applies to the traditional cigar iteration of R04_YG1005; “IF LOOP = GTRAD” precedes the GO TO Specifications that apply to the traditional cigar iteration of routing instructions.) However, the ASK Descriptions and GO TO Descriptions do not address the iterations separately. Instead, the overall description is given a single time and the iterated products are combined by slashes. (For example, “respondents who have ever smoked traditional cigars/cigarillos/filtered cigars” indicates that one iteration of the question applies to respondents who have ever smoked traditional cigars, another applies to those who ever smoked cigarillos, and another to those who ever smoked filtered cigars.) When GO TO Descriptions and response-level GO TO statements indicate routing to a variable within a loop, the root variable is referenced a single time and the iteration indicator suffixes are combined in brackets. (For example, “go to R04_YG1005[TC/CL/FC].”) This is done to simplify the presentation. Unless explicitly stated otherwise, variables for one iteration have no impact on a different iteration. For example, if a question about cigars refers to a variable that ends in [TC/CL/FC], only the TC variable applies to the traditional cigar iteration, only the CL variable applies to the cigarillo iteration, and only the FC variable applies to the filtered cigar iteration.

(6) Variables For Multiple Components. Some questions contain separate variables for multiple components. Examples of such items include “choose all that apply” questions, where there is a separate variable for each response category; questions that ask about duration, where data are recorded in separate variables as number and unit (days, months, years) combinations (number variables are indicated by the suffix _NN and unit variables are indicated by _UN); and questions that ask for a price, where data are recorded in separate variables as dollar (_D) and cent (_C) combinations. (Variables with the suffix _D, _C or _NN are open-field variables that allow respondents to enter any numeric value. As such, no discrete values are indicated for these variables. However, variables with the suffix _UN have values corresponding to set options from which the respondent must choose. Because _NN/_UN questions combine these two variable types, item-level notes are utilized to clarify that the discrete values presented in the instrument refer only to the _UN variable.) Each component variable in such items is differentiated using an appropriate suffix. (Please refer to the PATH Study User Guide for detailed information on variable nomenclature.) However, when variables with multiple components are referenced in routing instructions that precede the question, the component suffix is omitted. This is done to simplify the presentation, since before the question is asked, the respondent’s answer is not known. Unless explicitly stated otherwise, the reference to the root variable name (without the component suffix) in the logic means that the logic applies to the entire item, not just to a specific component variable. In routing instructions that come after the question, the specific variable with the component suffix is included, so that the routing instructions are clear and specific.

(7) Logic Checks. Some questions include a soft range check for responses. This means that respondents were not prevented from entering responses that were outside of the range. However, if a respondent entered a response that was out of range, they received a prompt noting their answer. They were asked to change their answer if it was incorrect or confirm their answer by proceeding to the next question. These logic checks are presented in the annotated instrument as probe questions, immediately following the question they check. Respondents are routed to the logic check and a program note specifies the conditions that trigger the prompt to be shown. If the respondent did not meet the trigger conditions, they proceeded to the next question without being shown the prompt. Logic checks are identified by the suffix _LC1 (or _LC2, etc.) added to the root variable name of the question they check. Although similar to actual questions, logic checks do not capture data. Logic checks are presented with ASK specifications, but without ASK descriptions to help distinguish them from actual questions.

(8) Never Users. The instrument refers to a respondent not reporting use of a product as having never used the product. As such, never usage includes respondents reporting that they have never used a product, or that they don’t know whether they have ever used the product, or refusing to answer

whether they have ever used the product. This design reflects programming and data collection necessities, rather than an analytic definition.

(9) Images. All generic images used to display examples during interview administration are included in an appendix. Images used to display tobacco brands, products, or advertisements are not included in this instrument.

(10) New Product Placeholder section. In the Wave 4 Youth data collection instrument, a placeholder section was included in the questionnaire to allow the possibility of adding new tobacco products to the survey during the data collection period. No product warranted activation of the section during data collection, so there are no data or variables associated with the section. Given that, the "New Product - Placeholder" section has been excluded from the Wave 4 Youth annotated instrument.

(11) References to Preload Data. As Westat prepares continuing respondent cases for data collection, data from prior waves are preloaded into the instruments for the current wave for longitudinal reference. For example, in the Wave 4 Youth instrument, identification of youth who have ever smoked a cigarette is based on the tobacco users groups and item responses from Waves 1 - 3 as well as responses to the Wave 4 instrument. Variables for this preloaded data are indicated by the prefix "R03_ ", signifying the most recent data at the close of Wave 3. When referencing data from previous waves, the instrument describes it as the respondents' answers "as of their last completed interview". For example, "continuing youth respondents who have ever smoked a cigarette as of their last completed interview".

(12) **/ Notation.** The **/** notation on some item IDs is indicative of a Wave 4 instrument error. The "***" represents an instrument SKIP ERROR which resulted in missing data for some respondents. See Appendix – Youth Instrument Skip Error Summary for more information. The "****" notation on some item IDs is indicative of a Wave 4 instrument DATA ERROR which are not attributed to any skip errors. Data errors are not systematic and occur for a variety of reasons at the individual respondent level (interview breakoffs, respondents moving back and forth in the questionnaire creating discrepant data, laptop failures, transmission errors, etc.). See Appendix - Youth Instrument Data Error Summary for more information.

(13) Questionnaire variables excluded from the data file. Several questionnaire variables are excluded from the PATH Study Wave 4 Public Use File (PUF) in order to protect the identity of the PATH Study participants. Some of the information in these variables will be retained and presented in new derived variables while other information will be entirely excluded from the file. Table 1 below contains a list of variables that are entirely excluded from the data file; Table 2 below contains a list of variables that are replaced with a new derived variable.

Table 1. Questionnaire variables entirely excluded from the PUF

Questionnaire Variable	Questionnaire Variable Description
R04_CPT05	Confirm DOB for Wave 1 shadow youth who is expected to be a youth at Wave 3
R04_CPT05C	Confirm DOB for Wave 1 youth who is expected to be a youth at Wave 3
R04_CPT05D	Confirm DOB for Wave 1 shadow youth who is expected to be a shadow youth at Wave 3
R04_CPT07	Corrected Youth DOB
R04_PM0021_NB	First names of siblings in multiple birth that are identical to youth
R04_PM0030_NB	First name of sibling that youth is a twin of
R04_PM0035_NB	First names of siblings that are in the multiple birth with youth
R04_PM0058_NEW_FNAME	First name of other parental figure or guardian
R04_PM0058_NEW_LNAME	Last name of other parental figure or guardian
R04_PM0061_NEW_FNAME	First name of the second other parental figure or guardian
R04_PM0061_NEW_LNAME	Last name of the second other parental figure or guardian
R04_PT0046_NEW_FNAME	First name of spouse/partner
R04_PT0046_NEW_LNAME	Last name of spouse/partner
R04_PARENT_PERSONID	Wave 4 Parent/guardian Participant ID Number
R04_PM0053	Confirm parent's relationship to youth
R04_PT0001_OS_1	Parent or guardian relationship to youth: Other relative
R04_PT0001_OS_2	Parent or guardian relationship to youth: Other non-relative
R04_PM0052	Confirm parent's spouse is same as reported in previous wave
R04_PT0046_NEW_AGE	Age of new spouse/partner
R04_PT0002_OS_1	Parent's spouse or partner relationship to youth: Other relative - specify
R04_PT0002_OS_2	Parent's spouse or partner relationship to youth: Non-relative - specify
R04_PM0058_PERSONID	Other parental figure/guardian participant ID number
R04_PM0058_NEW_AGE	Age of other parental figure/guardian
R04_PM0061_PERSONID	Second other parental figure/guardian PID
R04_PM0061_NEW_AGE	Age of second other parental figure/guardian
R04_PM0059_OS_1	Other parental figure/guardian's relationship to sampled youth: Other relative - specify
R04_PM0059_OS_2	Other parental figure/guardian's relationship to sampled youth: Other non-relative - specify
R04_PM0062_OS_1	Second other parental figure/guardian's relationship to youth: Other relative - specify
R04_PM0062_OS_2	Second other parental figure/guardian's relationship to youth: Other non-relative - specify
R04_PM0072_OS	Other language spoken at home: Some other language - specify (parent respondent)
R04_PM0016_NB	Youth was identified as a twin or part of a multiple birth
R04_PM0017_NB	Youth and sibling are identical twins

ELECTRONIC NICOTINE PRODUCTS

BOX ID: **R04_YVT01**

The next questions are about **electronic nicotine products**, such as e-cigarettes, vape pens, personal vaporizers and mods, e-cigars, e-pipes, e-hookahs and hookah pens.

These products are battery-powered and produce vapor or aerosol instead of smoke. They contain nicotine liquid, sometimes called “e-liquid” or “e-juice,” although the amount of nicotine can vary and some may not contain any nicotine at all.

Some can be bought as one-time, disposable products, while others can be bought as re-usable kits that are rechargeable. Some common brands include Vuse, Blu, Logic, MarkTen, NJOY, eGo, and iTaste.

PROGRAM - DISPLAY THE FOLLOWING TRANSITION TEXT AT THE START OF LOOPS:

IF LOOP = BTRAD Traditional Cigars (as blunts-only):

The next questions are about traditional cigars when smoked as blunts.

Traditional cigars contain tightly rolled tobacco that is wrapped in a tobacco leaf. Sometimes people take tobacco out of a traditional cigar and replace it with marijuana. This is sometimes called a blunt. As you answer these questions, please think only about your use of traditional cigars when smoked as blunts like those shown below. [ONLY IF THIS IS NOT THE LAST TIME THROUGH THE SECTION:] There will be a separate section later about other kinds of blunts.

[SHOW GENERIC IMAGE OF TRADITIONAL CIGAR]

IF LOOP = BRILLO Cigarillos (as blunts-only):

The next questions are about cigarillos when smoked as blunts.

Cigarillos are medium-sized cigars and sometimes come with plastic or wood tips. [Sometimes people take tobacco out of a cigarillo and replace it with marijuana. This is sometimes called a blunt.] As you answer these questions, please think only about your use of cigarillos when smoked as blunts like those shown below. [ONLY IF THIS IS NOT THE LAST TIME THROUGH THE SECTION:] There will be a separate section later about other kinds of blunts.

[SHOW GENERIC IMAGE OF CIGARILLO]

IF LOOP = BFILTR Filtered Cigars (as blunts-only):

The next questions are about filtered cigars when smoked as blunts.

Filtered cigars are usually brown and have a filter like a cigarette. [Sometimes people take tobacco out of a filtered cigar and replace it with marijuana. This is sometimes called a blunt.] As you answer these questions, please think only about your use of filtered cigars when smoked as blunts like those shown below. HOOKAH

BOX ID: **R04_YHT01**

The next questions are about smoking tobacco in a **hookah**, which is a type of water pipe. It is sometimes also called a "narghile" pipe. From now on, we will use "hookah" to refer to a water pipe or narghile pipe. There are many types of hookahs. People often smoke tobacco in hookahs in groups at cafes or in hookah bars.

People smoke **shisha** or **hookah tobacco** in a hookah. Shisha comes in many different flavors. Some types of shisha contain tobacco and some do not.

SMOKELESS TOBACCO

BOX ID: **R04_YST01**

The next questions are about **smokeless tobacco** other than snus.

Smokeless tobacco is a type of tobacco which you put in your mouth and chew, suck, or spit. It may be loose or packaged in small pouches that you can place directly in your mouth. There are many kinds of smokeless tobacco, such as dip, spit, moist snuff, pouches and chewing tobacco. Common brands include Skoal, Copenhagen, Grizzly, Redman, and Levi Garrett.

The questions will use the phrase "**smokeless tobacco**" to refer to these products. Please think about smokeless tobacco products, not including snus, as you answer these questions.

DISSOLVABLE TOBACCO

BOX ID: **R04_YDT01**

The next questions ask about another type of tobacco called **dissolvable tobacco**. You don't smoke dissolvable tobacco products – they are made of finely ground flavored tobacco that dissolves in your mouth.

Dissolvable tobacco products come in a variety of shapes, including small round pellets, thin sticks and flat strips. Some common brands are Ariva, Stonewall, or Camel Orbs, Sticks or Strips.

The next questions are about common psychological, behavioral, and personal problems. These problems are considered significant when you have them for two or more weeks, when they keep coming back, when they keep you from meeting your responsibilities, or when they make you feel like you can't go on.

After each of the following questions, please tell us the last time, if ever, you had the problem, by answering whether it was in the past month, 2-12 months ago, over a year ago, or never.

APPENDIX – YOUTH INSTRUMENT SKIP ERROR SUMMARY

This table summarizes skip errors in the data collection instruments that resulted in missing data on these items for some respondents. Items that were fixed during data collection will have some missing data and some non-missing data.

Item(s)**	Description of Issue	Issue Fixed during Wave 4 Data Collection?	Date Issue was Fixed
R04_YC1220	This item was skipped incorrectly by some respondents who were Past 30 day "not-light" cigarette smokers (R04_PAST30DAY_CIGS_LEVEL = 2) and tried to completely stop using all tobacco products within the past 12 months (R04_YN0126 = 1).	Yes	1/12/2017
R04_YX0675	This item was skipped incorrectly by respondents who have smoked part or all of a traditional cigar, cigarillo or filtered cigar with marijuana in it in the past 12 months (R04_YG9107 = 1) and have not smoked a traditional cigar, cigarillo or filtered cigar as a blunt in the past 30 days (R04_30DBLUNT_ONLY_BTRAD = 2, R04_30DBLUNT_ONLY_BRILLO = 2, R04_30DBLUNT_ONLY_BFILTR = 2).	Yes	1/12/2017
R04_EVER_USER_ALC	R04_EVER_USER_ALC was set incorrectly for some new baseline or replenishment sample youth (R04_YOUTHTYPE = 2, 3) who have ever used alcohol (R04_YX0084_NB = 1). The incorrect setting of R04_EVER_USER_ALC also caused the following items to be skipped incorrectly: R04_YX0170, R04_YX0175_01 – R04_YX0175_07, R04_YX0171, R04_YX0172, R04_YX0173, R04_YX0193, R04_YX0174, R04_YX0194.	Yes	1/12/2017
R04_YV9044	This item was skipped incorrectly by respondents who selected "something else" in R04_YV9035 in addition to e-cigarette, e-cigar, e-pipe, and/or e-hookah.	No	
R04_YV1026, R04_YV1027	These items were skipped incorrectly by respondents who did not know or refused to provide how many electronic nicotine products, cartridges, or milliliters of e-liquid they used each day in the past 30 days (R04_YV9040 = -8, -7).	No

Item(s)**	Description of Issue	Issue Fixed during Wave 4 Data Collection?	Date Issue was Fixed
R04_INIT_SNUS_YOUTH	Values for this data collection variable were not set correctly for some respondents. The incorrect setting for R04_INIT_SNUS_YOUTH also caused R04_YY0601 to be skipped incorrectly by continuing respondents who initiated tobacco use and initiated snus use.	No	
R04_PAST30DAY_BIDI	Values for this data collection variable were not set correctly for respondents who did not try a bidi in the past 12 months (R04_YB9102_12M_01 != 1) but indicated that they tried a bidi in the past 30 days (R04_YB9102_30D_01 = 1). The incorrect setting of R04_PAST30DAY_BIDI also caused the following items to be skipped incorrectly: R04_YX0307B_01 – R04_YX0307B_13.	No	
R04_PAST30DAY_KRETEK	Values for this data collection variable were not set correctly for respondents who did not try a kretek in the past 12 months (R04_YB9102_12M_02 != 1) but indicated that they tried a kretek in the past 30 days (R04_YB9102_30D_02 = 1). The incorrect setting of R04_PAST30DAY_KRETEK also caused the following items to be skipped incorrectly: R04_YX0307K_01 – R04_YX0307K_13.	No	
R04_PASTYEAR_TOB_USE_LEVEL	Values for this data collection variable were not set correctly for respondents who used electronic nicotine products in the past year (R04_YV1112 = 1, 2, 3, 4, 5) and have used electronic nicotine products more than once in their lifetime or did not know or refused to provide a response to the number of times they have used electronic nicotine products (R04_YV1005 > 1 OR R04_YV1005 = -8, -7 OR R03_NUMLIFE_EPORD = 1). The incorrect setting of R04_PASTYEAR_TOB_USE_LEVEL also caused R04_YX0742 to be skipped incorrectly.	No	

APPENDIX – YOUTH INSTRUMENT DATA ERROR SUMMARY

This table summarizes variables with data errors that are not attributed to any skip errors in the data collection instruments. For some respondents, these variables have missing data. Data errors are not systematic and occur for a variety of reasons at the individual respondent level (other-specify text response coding, interview breakoffs, respondents moving back and forth in the questionnaire creating discrepant data, laptop failures, transmission errors, etc.).
